ABSTRACT (Continue on reverse side if necessary and identify by block number) Abstract: The bibliography, a supplement to Hudgens and Torsani-Fatkin (1980), is a compilation of 1891 references dealing with, or related to, the effects of sex differences on human performance. Four major categories are defined: An Overview of Sex Differences, Physiological Sex Differences, Sex Differences in Cognitive and Motor Abilities, and Sex Differences in Personality. While emphasis is on literature published in the period 1979-1981, many earlier works omitted from the 1980 bibliography are included. An index of first authors is provided.

INTRODUCTION

This bibliography represents a continuation of our effort to maintain a data base of current information relating to possible effects of sex differences and the menstrual cycle on performance and to make this information available to other laboratories and investigators seeking to expand the data base through active research efforts.

Our previous related bibliographic publications include:

Billingsley, P.A., & Hudgens, G.A. Human performance: Sex differences and the influence of the menstrual cycle (A selected bibliography). Aberdeen Proving Ground, MD: U.S. Army Human Engineering Laboratory, May 1978.

Hudgens, G.A., & Torsani-Fatkin, L.L. Human performance: Psychological and physiological sex differences (A selected bibliography). Aberdeen Proving Ground, MD: U.S. Army Human Engineering Laboratory, February 1980.

Torsani-Fatkin, L.L. & Hudgens, G.A. Human performance: Women in nontraditional occupations and the influence of the menstrual cycle (A selected bibliography). Aberdeen Proving Ground, MD: U.S. Army Human Engineering Laboratory, May 1980.

As in the 1980 bibliography, the material is divided into four major subject areas: I. Sex Differences: Overview; II. Physiological Sex Differences; III. Sex Differences in Cognitive and Motor Abilities; and IV. Sex Differences in Personality. An Index of First Authors is provided at the end for the user's convenience.

Materials for this bibliography were located primarily by means of continuous monitoring of Current Contents (both the Social and Behavioral Sciences weekly issues) and by extensive cross-referencing of materials already obtained.

The authors wish to express their sincere gratitude to Joyce Watlington, Doris Eanes, Violet Confer, Danette Barranco, and Lilly Williams, for their dedicated and skilled technical assistance in preparing this document.
